Activity 6- You have homework about how to grow a vegetable or fruit. One of your friends presents her homework about raisins. Listen to the tapescript and answer the questions.

Raisins are dried grapes that have been eaten for thousands of years. Nearly 3500 years ago, the first raisins were discovered as grapes that were dried in the sun on a vine. In Medieval Europe, raisins were used as sweeteners, medicine and even as a form of money. In America, raisins were first found after a heat wave in California, in 1879. After this disaster, farmers began developing seedless grapes that were thin-skinned and sweet. The grapes were dried in the sun and became the popular dark raisin we eat and enjoy today. There are many varieties of raisins. The golden raisin which is dried by using special methods is one of them.

Today, central California remains the centre of the world's raisin industry. The 95% of the raisins is produced by this city. Its green valleys, sunny climate and hot temperature provide the perfect conditions for the grapes that are dried into raisins.

"Mind If I Stay"

Do you mind if I stay
I'll blend in with the air
Oh I've never felt this alone
Do you mind if I stay
I'm the guardian of your nights
Turning your sorrow into gold
Would you pay for my loans
Cause I won't make it till old bones
Can you read my smoke signals

Listen to the universe, you may find an answer
Love is here and everywhere, don't be scared
Listen to the universe, you may find an answer
Love is here and everywhere, don't be scared
Do you mind if I stay
Your face is haunting me
I'll find the answers in my dreams
I'm still hung up on you
Your silence is a dusty death road
Who knows where the wind will blow
Listen to the universe, you may find an answer
Love is here and everywhere, don't be scared
Listen to the universe, you may find an answer
Love is here and everywhere, don't be scared
I'm just a man lost in space
Calling out, hoping to hear something back, something back
I'm just a man lost in space
Calling out, hoping to hear something back, something back
Listen to the universe, you may find an answer
Love is here and everywhere, don't be scared

A total of 1,513 people were drowned that day. Because of this disaster, a lot of magazines were printed in many languages, new international safety laws were passed and Ice Patrol was established. Listen and write the names of the audience for each suggestion list.

-Dear advice columnist,

I'm a 13 years old boy. I'm overweight. My friends sometimes make fun of my appearance. I feel ashamed. What can I do?

-Dear William ,

I think your self confidence is probably a little low at the moment. Let me give you a piece of advice. If I were you, I would see a dietician first. You should go on a diet , and abstain from junk food. When you start losing weight, everything will turn out to be better.

-Dear advice columnist,

I have graduated from high school. I couldn't pass the university exam. My parents are disappointed. I also feel frustrated at all. I want to do something to cope with this situation. What can I do?

-Dear Samantha,

I think you shouldn't blame yourself. If I were you, I would have a part time job. You shouldn't save money and then go on a short trip. You should take more responsibility. It will help you feel accomplished and more motivated.

-Dear advice columnist,

I am an animal lover. I have a pet dog named Lassy. My best friend Clara is afraid of dogs. Wherever she visits me , I have to keep my dog alone in a room. I feel full of remorse after doing it. I don't want to ruin our friendship. What can I do?

-Dear Patrick,

I think friends shouldn't put each other in difficult positions. Clara's visits to your house are obviously causing you a lot of stress. You should deal with it sooner or later. If I were you, I would discuss this subject with her next time you get together.

As long as we sailed through the Grand Canal, we experienced the most picturesque sides of Venice. When I tasted the pizza in one of the most famous ,local restaurants ,I offered the second slice of it as it was really delicious.Once we decided to eat an ice-cream, we spent too much time to choose because there were nearly 40 kinds of it. Our hotel had a great sea view.While I was watching the sunset, I felt relaxed. In the ball room, as the musicians were playing their instruments, the visitors were dancing happily.

Our mission- to become the spaceline for Earth- will open the space to everybody. It will allow a new generation of adventurers to embark on a life. CZD Space has marvelous vehicles that will take you to space. Unless we provide the safety of our passengers, crew and vehicles we don't offer this life changing experience. Emily: How do you sleep in space?

Astronaut: After a long day a, nothing is better than a good night's sleep! Space has no "up" or "down", but it has microgravity. As a result, we are weightless and can sleep any orientation. However, we have to attach ourselves so we don't float around and bump into something.

Matthew: Is eating in space different than eating on Earth?

Astronaut: Well, we eat three a day, too. There are no refrigerators in space, so space food must be stored and prepared properly to avoid spoilage, especially on longer missions. We can choose from many types of food such as fruits, nuts, peanut butter, chicken, beef, candy, brownies etc. They all come in disposable packages. We need to throw packages away in order not to wash the dishes.

Jane: What about your morning routine in space?

Astronaut: We have the same hygiene needs as people on Earth. We wash our hair, brush our teeth, shave and go to the bathroom. However, because of the microgravity environment, we need to take care of ourselves in different ways. We have to wash our hair with a special shampoo not to rinse our hair.

Tom: What do you do in your spare time?

Astronaut: Like most people who work full time, we get weekends off. We need to have some activities to relax. During our off time, we play games, watch movies, read books and talk to our families. We also have exercise bike and a treadmill to keep our bodies in shape.
